The Weee listing matches Fundokin's official 200ml product by name, size, official item code, ingredient/allergen profile and a corroborated JAN. Fundokin Shoyu Co., Ltd. is verified as the official product company and shipper. Public sources do not prove that this exact sell unit was made at a specific facility or identify the parties responsible for US import.

02 Load-bearing findings

A The exact product identity is supported.

Fundokin's official product and shop pages identify the same Japanese name, 200ml size and item code; independent product records corroborate the JAN.

B The official company identity is verified.

Fundokin's shop names Fundokin Shoyu Co., Ltd. as shipper, and its company profile confirms the legal English name and relevant product business.

C A company-owned factory is not yet an SKU-to-facility link.

Fundokin lists a soy sauce factory in Usuki, but the public pages reviewed do not say that this exact product was made there.

Nissin Raoh Dandan Noodles

Public-data discovery sample for a Weee Global+ listing

PUBLIC-EVIDENCE DISPOSITION

Public identity evidence incomplete

Exact sell unit, legal manufacturer, physical facility, US owner/consignee and FSVP importer remain unresolved.

Marketplace	Weee
Seller shown	Tao Japan
Listing title	JAPAN RAOU DANDAN RAMEN 1pc
Origin claim	Japan
Brand candidate	Nissin Raoh
Brand-owner candidate	Nissin Foods Co., Ltd. / 日清食品株式会社
Legal manufacturer	Unresolved
Physical facility	Unresolved
FSVP importer	Unresolved

01 Decision summary

This listing can be tied to a Nissin Raoh product family, but public evidence does not establish the exact sell unit or the legal entities responsible for manufacture and US import. Before relying on a public FDA name match, request the minimum identity documents below and rerun screening against the confirmed facility—not the consumer brand alone.

02 Load-bearing findings

A The sell unit is ambiguous.

The title says “1pc”; captured images show both an individual packet and a five-meal retail pack.

B Product-family evidence is not facility evidence.

Nissin’s official record identifies a 2019 five-meal, 475g Dandan product with JAN 4902105109625, but not the facility that produced this listed unit.

C Name-only FDA matches create false positives.

A Nissin-named Singapore entity was found and excluded because the country, product scope and legal identity do not connect it to this Japan-origin listing.

EVIDENCE CHAIN AND EXCLUSIONS

What is proven—and what is not

03 Evidence chain

CLAIM	STATUS	SOURCE	REASONING

Candidate linkage: Nissin PTE LTD.	EXCLUDED	FDA Import Alert 16-81	Singapore entity; no legal-entity, facility, product or address link to the Japan-origin listing.
The exact manufacturer, facility and FSVP importer are known.	UNRESOLVED	Public sources reviewed	No readable back label, entry document or seller evidence was available.

04 Listing-image consistency check

 Individual Dandan packet; consistent with “1pc,” but no readable back label.	 Five-meal Dandan retail pack; consistent with Nissin's official product-family record.	 Marketing image includes a soy-sauce Raoh package, not the Dandan sell unit.
